Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 9/27/06 and prior.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 5 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter, specifically a computer program or software application. Computer programs claimed as computer code per se, i.e., the descriptions or expressions of the programs, are not physical "things," nor are they statutory processes, as they are not "acts" being performed. Such claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed aspects of the invention which permit the computer program's functionality to be realized. In contrast, a claimed computer - readable medium encoded with a computer program defines structural and functional interrelationships between the computer program and the medium which permit the computer program's functionality to be realized, and is thus statutory. See MPEP §2106 Section IV.B.1(a).

Claim Objections

3. Claim 2 is objected to because of the following informalities: the recitation of "a template selection means which selects said template in said template memory means: said layout processing means conducts layout processing for plural pictures based on said selected template..." in lines 14-17 is grammatically awkward and unclear in meaning, particularly where the ":" (colon) is placed in the sentence. While the Examiner will make the best effort in

interpreting the claim language in view of the context of the specification, appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Simon et al. (“Simon”, US 2002/0040375 A1).

As per claim 1, Simon teaches a picture layout processing apparatus which conducts layout processing for plural pictures, comprising: an attractive region calculation means which calculates an attractive region in a second picture which is overlapped and is behind a first picture, and a layout processing means which conducts layout processing so that the attractive region in said second picture is not overlapped by and hidden by said first picture (paragraphs [0057-0059] and [0068]; *the second picture being the background containing areas of interest which is desirable to be substantially viewed, wherein the layout processing would be constrained so as to avoid the placement of the first picture in the areas of interest*).

As per claim 2, Simon teaches a template memory means which stores a group of templates which defines layouts for plural pictures, a template selection means which selects said

Art Unit: 2174

template in said template memory means, wherein said layout processing means conducts layout processing for plural pictures based on said selected template, so that the attractive region of each pictures is not hidden (paragraphs [0050-0051]; *templates of the page layout are stored for future use*).

As per claim 3, while Simon does not expressly indicate a means which selects another template in the case in which a layout of said plural pictures cannot be decided based on said selected template. However, since Simon teaches the layout processing means to generate and store acceptable page layout templates for future use (paragraphs [0050-0051]), it is clear that there will always be an instance where the templates would be provided/presented to the user so that the user could decide, or not decide to select the particular template being presented for selection depending the level of user's desirability. When the user decides not to select the particular template being presented, the user may choose to explore another template for possibility of use.

Claims 4-5 are individually similar in scope to claim 1, and are therefore rejected under similar rationale.
